

Boasting faster lap times and an extended tyre life, the POTENZA RE-71RS tyre is now faster than before. This signature sports tyre delivers a thrilling steering experience through superior cornering grip performance, precise handling, and enhanced durability.

BORN TO BE FAST, NOW EVEN FASTER

Asymmetric Tread Pattern

Each area across the width of the tread has been optimised to maximise the contact patch. Contact pressure is also more uniform which maximises grip and wear life.

Optimised Main Grooves

The two wide main grooves on the inside of the tyre ensure high drainage for strong wet performance. The inside grooves allow tread rigidity for high grip when cornering.

Low Angle Grooves

By arranging grooves at a low angle, lateral rigidity is increased, resulting in higher steering response and grip during cornering.

Slick Shoulder Block

The large area outside shoulder block raises the cornering limit.

1 Exceptional Dry Grip for Track Driving

High grip polymer maximises tyre performance through optimizing the contact areas between tyre tread and road surface

2 High Speed Stability and Steering Precision

Low Angle Grooves and Optimized Main Grooves enhance control, delivering ultimate cornering stability

3 Improve Wear Life Performance

Asymmetrical tread profile and slick shoulder block improve wear life and durability for ultimate performance

RE-71RS has wider contact area and grip road surface by whole tread area.

TEST CONDITIONS
Tyre size: 215/45R17 91W
Air pressure: 240kPa
Test location: Tyre dynamic contact surface analysis device in our technical centre
